

All about bats.

author/illustrator: Emilia B.

Chapter 1: basics

Bats are mammals. They are the only mammals that can fly.

Bats make chocolate trees.

Without bats how would there be many chocolate trees?

Here is how they make them. Do you know how they poop when they fly?

The poop has food to grow seeds. Bats eat fruit and they spit out the seeds. Well sometimes the poop falls on the seeds. That's how they make chocolate trees!

Chapter 2: How Physical characteristics helps them survive

Well you know bats have ears? They have to hear their babies!

Plus their wings aren't for nothing. They fly! Without wings how would they fly!?

Look at this picture! The bat has wings and it's flying.

Their nose is to smell. And they need to eat! With their mouth!

Chapter 3:How it parents their babies.

Well bats grow.

You will see how it grows!

Look at the picture above! But how does it grow? Your about to see how the mom helps its bat pup grow!

Remember?, I told you bats eat fruit?
Bat pups don't! Their moms feed them milk!

So we are going to find out the behavior of it!

How it does this: The mom makes milk

How it helps the bat pup survive: The mom has to eat a lot to make the milk so her baby can survive

Chapter 4: How bats adjust to season changes

Bats have no food in winter months!

But how do they survive?

You're about to find out!

Bats hibernate (hi-ber-nayt). Why? Here is the answer! Bats have no food in winter months so they have to hibernate!

Chapter five: More basics

Did you know that a baby bat is called a pup?

All bats have teeth!

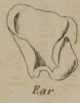

Glossary

Hibernate: sleep

Pup: baby bat

Parent: take care of their babies

Adjust to season changes: do different things in different seasons
